no service

Sundays

no service

Service Restrictions: Tu - Operates only on Tuesdays

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgttd 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. However it is free for all stops in Lincolnshire & in the SW region. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. However it is free for all stops in Lincolnshire & in the SW region. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Sundays

no service

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. However it is free for all stops in Lincolnshire & in the SW region. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. However it is free for all stops in Lincolnshire & in the SW region. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. However it is free for all stops in Lincolnshire & in the SW region. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

esxgtatw	Great Saling, opp The White Hart	Bardfield Road	1500240030Y1

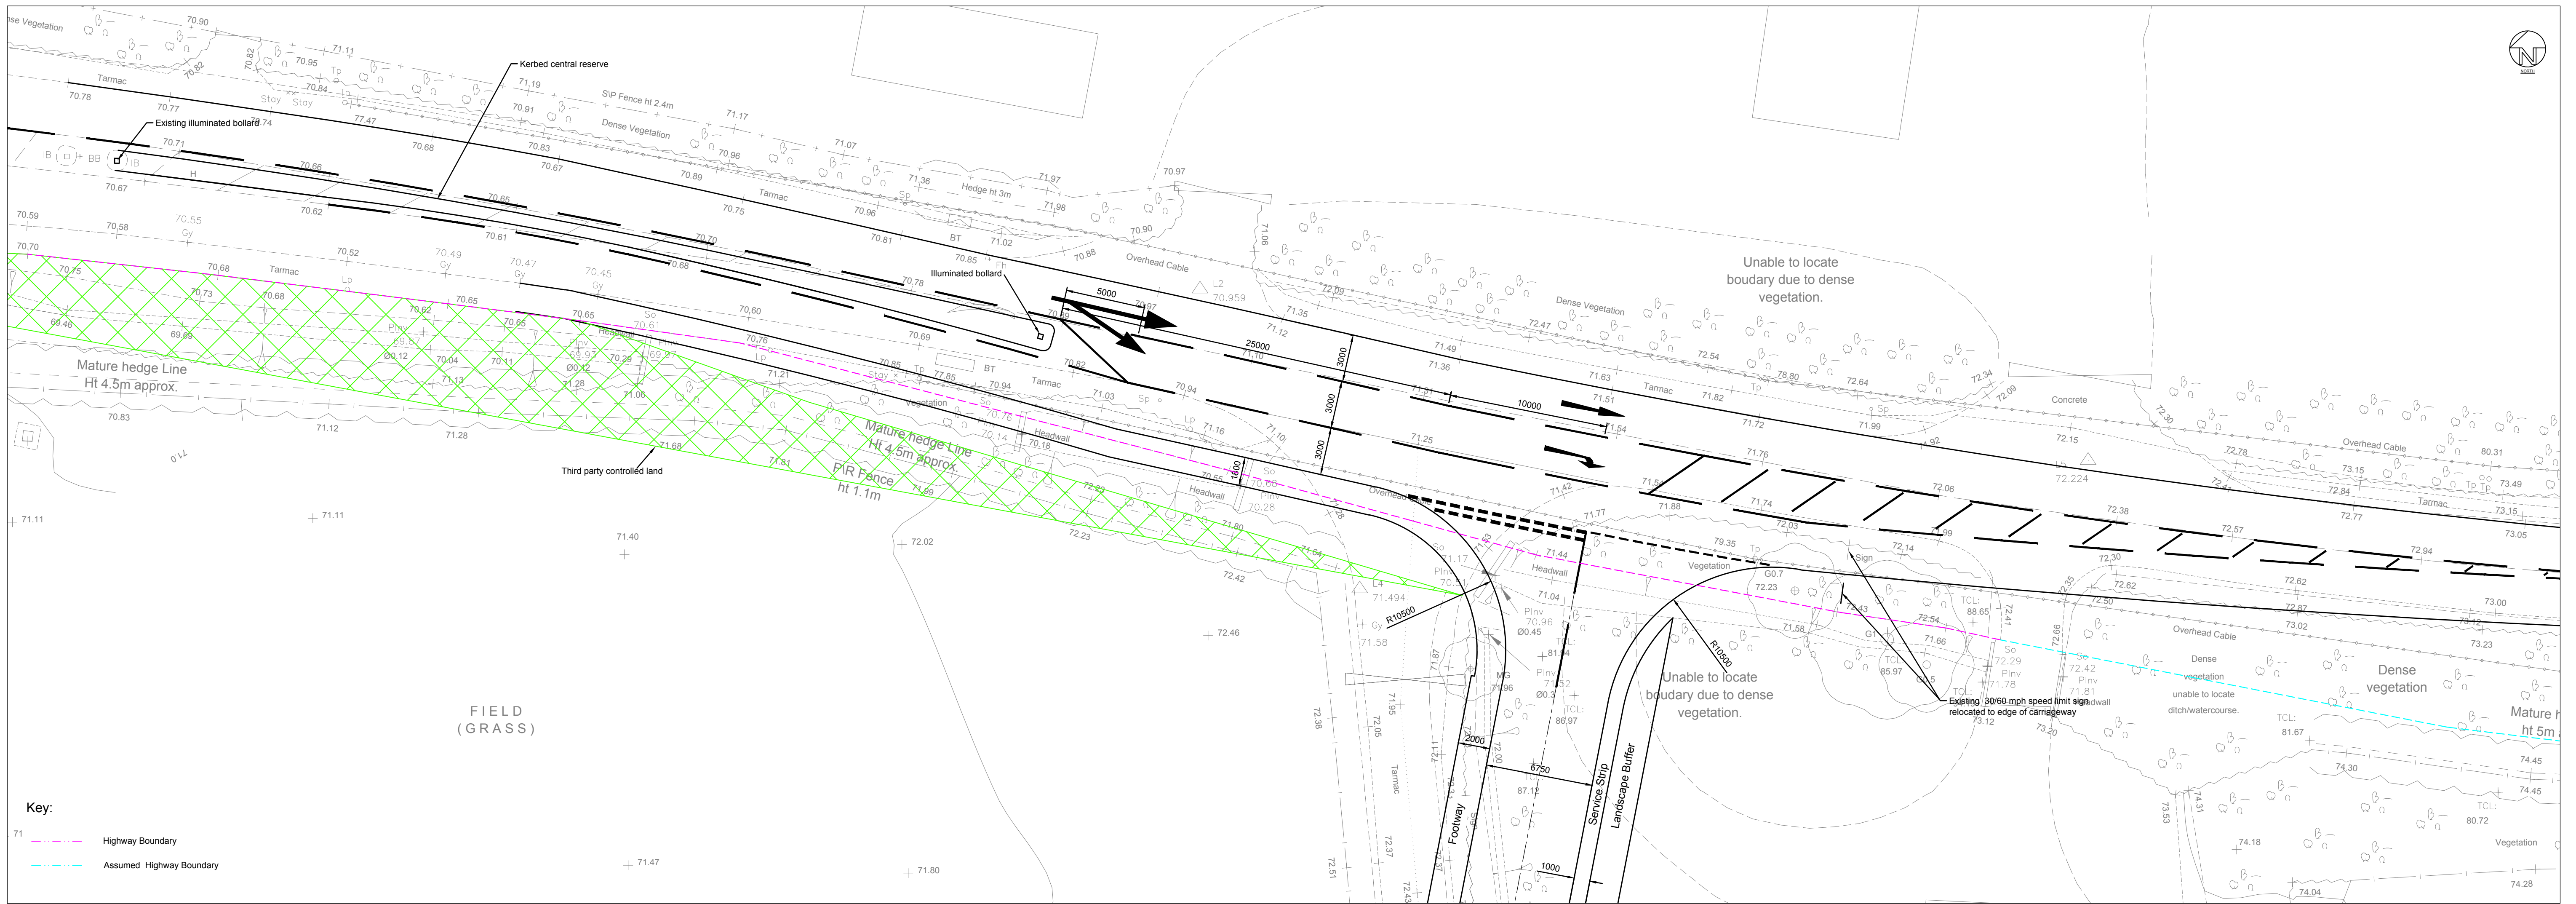

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. However it is free for all stops in Lincolnshire & in the SW region. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

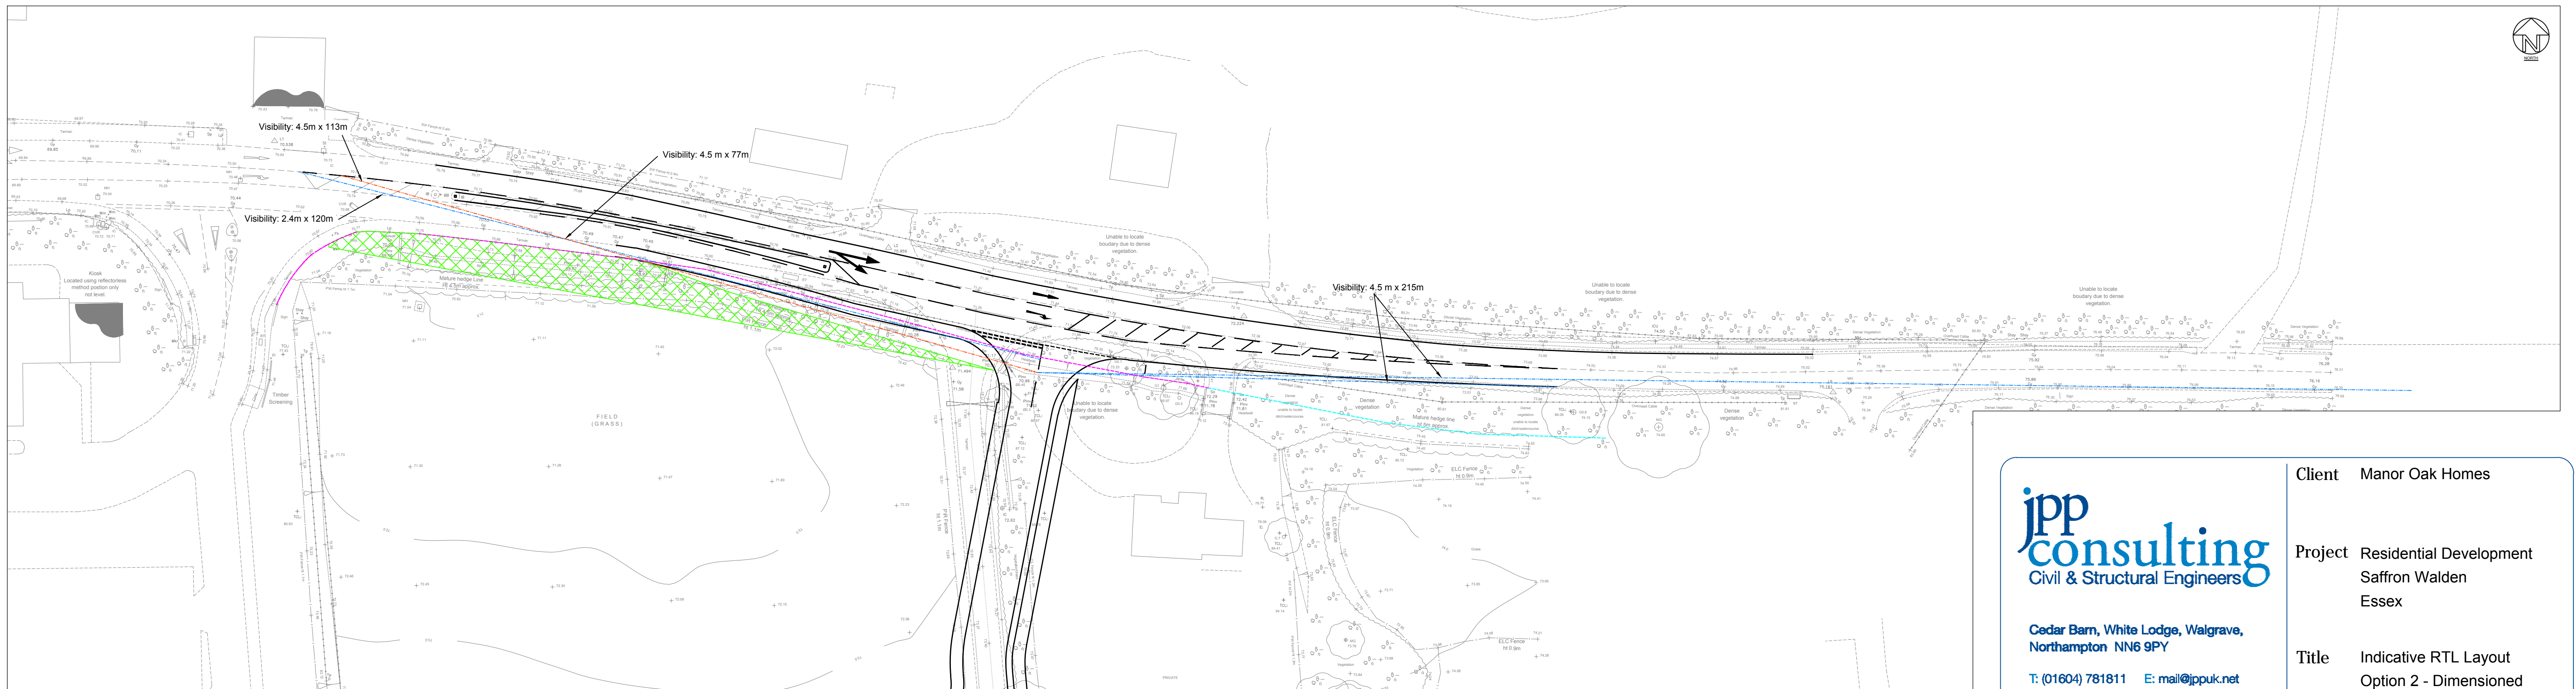

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

JPP Drawing no. R6694PP-E11B

General Arrangement
Scale 1:200

Junction Visibility
Scale 1:500

Notes:

1. RTL designed in accordance with DMRB 42/95 'Geometric Design of Major / Minor Priority Junctions'. To a design speed of 50/60 kph or 31/37 mph.
2. Recorded 85th %ile speeds:
Eastbound: Mean 38.7mph - 85th %ile 44.5mph
Westbound: Mean 35.5mph - 85th %ile 40.9mph
Two way: Mean 37.2mph - 85th %ile 43.2mph
3. Visibility splay to left based on 85th %ile speed. I.e. 71.6 kph or 120m
4. Visibility splay to right based on speed limit i.e. 96kph or 215m
5. Access to be street lit subject to Essex County Council Highways requirements.

Road Safety Audit Stage 1

on behalf of JPP Consulting

TMS reference no: 11251

Radwinter Road, Saffron Walden

Road Safety Audit Stage 1

1. Introduction

- 1.1 This report describes a Stage 1 Road Safety Audit carried out on a proposed ghost island right turn lane on Radwinter Road, Saffron Walden to serve a mixed-use development, on behalf of JPP Consulting. The audit was carried out on 25th November 2013 in the offices of TMS Consultancy.
- 1.2 The audit team members were as follows:-
- Darren Newbold – MSc, BSc (Hons), MCIHT, MSoRSA
Engineer, TMS Consultancy
- Harminder Aulak - BSc (Hons), IEng, FIHE, RegRSA (IHE)
Principal Engineer, TMS Consultancy
- 1.3 The audit comprised an examination of the drawings and other information relating to the scheme supplied by the design office, which is listed in **Appendix A**. The site was visited by the Audit Team on 21st November 2013 at 12.45pm. The weather was cloudy and damp. Traffic flows were light. Pedestrian and cycle flows were light.
- 1.4 The terms of reference of the audit are as described in HD 19/03. The team has examined and reported only on the road safety implications of the scheme as presented and has not examined or verified the compliance of the design to any other criteria.
- 1.5 All of the problems described in this report are considered by the audit team to require action in order to improve the safety of the scheme and minimise accident occurrence. The locations of specific problems are referenced on the plan in **Appendix B**.
- 1.6 The scheme consists of a proposed ghost island right turn lane on Radwinter Road, Saffron Walden to serve a mixed-use development.

2. Items resulting from this Stage 1 Audit

2.1 PROBLEM

Location – Radwinter Road; Development Access

Summary: Potential speed and darkness related vehicle conflicts

The national speed and 30 mph speed limit terminal change is located very close to the proposed junction and the speed data provided shows the two-way 85th percentile speed at this location to be 43.2 mph. The combination of the introduction of new vehicle turning manoeuvres and high vehicle speeds may result in pull out and turning type vehicle conflicts at the junction.

In addition to this, the existing lighting through the scheme appears to be old and the level of illumination that they provided is unknown. Poor lighting at this location may increase the 'rural' nature of the road, particularly for westbound drivers and encourage higher vehicle speeds. Poor visibility around the junction due to poor illumination may increase the risk of vehicle pull out and turning type collisions.

RECOMMENDATION

The speed limit should be relocated further to the east, in advance of the new junction. Lighting should be improved, if necessary and extended in accordance with the relocated speed limit.

2.2 PROBLEM

Location – Radwinter Road; existing access

Summary: Potential vehicle conflicts

There is an existing access to a property on Radwinter Road to the east of the proposed development junction. The drawing does not show how this access will relate to the new kerb line.

In addition, eastbound drivers on Radwinter Road after clearing the new junction may not expect vehicles to be stopped waiting to turn into the access. Shunt type vehicle conflicts may result.

RECOMMENDATION

At detailed design stage the private access should tie in appropriately to the new kerb line. A right turn lane pocket should be provided within the hatching to allow right turning vehicles to wait without blocking eastbound through traffic.

2.3 PROBLEM

Location – Radwinter Road; drainage ditch and headwalls

Summary: Potential vehicle and pedestrian hazard

There is an existing drainage ditch within the southern verge on Radwinter Road with a number of headwalls. It is not known if the headwalls will be relocated as a result of the carriageway widening and footway improvement. Exposed headwalls may be a hazard to occupants of errant vehicles and to pedestrians who may fall / trip at the rear of the footway.

The drainage ditch itself may present a risk of drowning too to pedestrians that fall / trip at the rear of the footway.

RECOMMENDATION

It should be clarified at detailed design stage if there are to be any works carried out in relation to the drainage ditch and headwalls. It may be prudent to provide a pedestrian restraint system such as post and rail fence at the rear of the footway.

2.4 PROBLEM

Location – Radwinter Road

Summary: Potential vehicle to pedestrian conflict

It is not known whether the development access will create additional pedestrian movements on the footway on the north side of Radwinter Road heading eastwards out of Saffron Walden. If so, the lack of a pedestrian crossing facility to the west of the proposed junction may mean that pedestrians choose to cross Radwinter Road close to the junction where the road is at its widest and at a location where drivers are concentrating more on vehicle turning manoeuvres. Vehicle to pedestrian conflict may result.

RECOMMENDATION

The need to and feasibility of providing a pedestrian crossing point to the east of the proposed junction should be assessed, based on likely pedestrian trip generation from the east.

2.5 OTHER ISSUES

- 1) At detailed design stage, existing street furniture such as telegraph pole and signs will need to be relocated out of the proposed footway. In addition, there is an existing triple BT chamber within the existing footway that will be within the widened carriageway. These should be relocated out of the carriageway.

- 2) There is an existing pedestrian refuge island to the west of the proposed junction that may have increased demand as a result of the development. The existing refuge is quite narrow and no tactile paving is provided (either within the refuge or on the footway). The feasibility of widening the refuge and providing tactile paving should be assessed at detailed design stage.

3. **Audit Team Statement**

I certify that the terms of reference of the audit are as described in HD 19/03.
